

Vietnam & US Cyber Comparison

Project Title	Vietnam & US Cyber Comparison
Project Summary	Cyber has never been more important and US Mission Vietnam needs some help comparing where the US and Vietnam are the similar and different. Help us define the gaps and common frameworks between the two countries. What are the defined threats, vulnerabilities, and suggested mitigations.
Country	United States
Agency	Department of State
DoS Office	EAP/EX
Post	N/A
Section	N/A
Number of Interns	2

Project Description

Last year e-interns begin the review of several VN circulars and US laws to summarize to help create a gap analysis of this. This year will continue to build out that document. One result will be an appendix that highlights all common areas that the two nations can strengthen their partnership as improving. The second result will be a APA format 4-6 page report that covers the current state. The third result will be suggested engagement in September to support the October Cyber Security month.

Desired Skills Interests

Additional Information

This project is expected to last 9 months. Cyber policy is quickly evolving. This project will help map out the US and VN offices areas of responsibilities and highlight potential mutual engagement. This will include reviewing VN and US Cyber policy, graphics, and the web. There are best practices in cyber that include a multi-stake holder approach and engagement across; government, business, and academic. As one of the most

exploited countries in the world, where can the US and VN best benefit from collaboration? Success will include a 2-5 slides mapping out the similar offices across US and VN that have cyber responsibilities and 3-4 page document highlighting gaps and areas of mutual interest.
